

# PRO 150 SERIES

Banknote Counters With Calculation

Clear Advantages

The construction of PRO 150 is reliable and is designed for prolonged use. Specially designed wide feeding rollers are made from polyurethane to guarantee perfect introduction of banknotes of any physical condition.

The cashier doesn't have to make any notes while using a calculator to perform the counting of sorted banknotes of different denominations.

For counter's cleaning it is enough to open back cover and then to open a clamping cover of a path by means of the lateral buttons.

Processing banknotes of any condition
